

## You are interested in joining our commitment for global equity and the preservation of livelihoods?

With us you have the possibility to:

- support a specific area through one of our Theme Funds
- create a Fiduciary Foundation under the management of the Foundation for Sustainability as the trust foundation, like for example your own foundation in your name
- design your private will/testament in the manner of future sustainability.

Feel free to contact us! Together we will find the perfect match for your commitment. We are pleased to meet you in person and provide further information on our work. Furthermore we offer the possibility of meeting with our specific experts from various thematic areas.

## Sustainable Investment as part of our joint responsibility

The Foundation for Sustainability and Germanwatch do foster an intense dialogue with a variety of national and international players that are striving towards the financial commitment for the necessary transformation processes as well as sustainable ways of monetary and capital investments.

The Foundation has obliged itself to invest its assets under clear sustainability criteria and thus also enhanced the overall debate in this area within the foundations and philanthropic sector in Germany.

## Achieving more together

### G20 - FOUNDATIONS TAKE A STAND

If you as a foundation are interested in becoming part of the G20 Foundation-Platform do not hesitate do get in touch!

## My donation- My contribution

### Donations for the Foundation for Sustainability

can be applied directly or be forwarded to actual projects, lobbying work or campaigns - like for example to Germanwatch.

### Endowment contributions

for the Foundation for Sustainability are meant for eternity - to continuously draw attention to climate protection, fighting poverty and food security. The Foundations basic assets are directly strengthened through each endowment contribution.

### Other funding instruments

For your long-term engagement together with us we do provide two Theme Funds *Innovative Instruments on Litigation in the area of Climate Protection and Animals.People.Rights* as well as the possibility to create a Fiduciary Foundation under the management of the Foundation for Sustainability as a trust foundation.

All donations and endowment contributions are tax-deductible. For further information please do not hesitate to contact us.

## Together for a sustainable future and a social and environmentally fair globalization

- Become a supporting foundation to the G20 Foundation-Platform
- Your endowment contribution to the Foundation for Sustainability
- Your support for Huaraz

We believe that the **transformation of society and economy in accordance with the UN Agenda 2030 agreement made by the heads of state of the United Nations as well as the implementation of the Paris agreement from 2015 is possible.** Foundations especially can significantly contribute to the success of this transformation by promoting and creating open spaces for dialogue and cooperation.

In cooperation with further societal players and stakeholders we aim to create and leverage models and ideas that are both economically sustainable but at the same time environmentally friendly, socially acceptable as well as capable to counteract on negative developments. These transformational processes we are aiming to support with our expertise as well as financial resources.

The Foundation for Sustainability shares its commitment towards global justice and the preservation of livelihoods as defined by the UN Agenda 2030 with the Non-Governmental Organization Germanwatch. Aiming in first priority the financial independence and thus the continuity of Germanwatch's work, members and friends of the organisation created the Foundation for Sustainability at the end of 1997.

Since setting-up the Foundation more than 30 co-founders and donors have expanded the Foundation's scope for action.

As the founding donor I would like to invite you to join us in this common commitment **for global equity and the preservation of livelihoods.**

Klaus Milke  
Chairman of the Board of the Foundation for Sustainability  
Chairman of the Board of Germanwatch

## Taking over joint responsibility

- We work actively in our role in implementing the **Agenda 2030** and its **17 Sustainable Development Goals (SDG)** through facilitating dialogue and creating open spaces for discussion and exchange of views.
  - We actively support and promote the **transformation processes** implied by the Agenda 2030 by creating networks and setting impulses on a German as well as an international level the **sustainability debate**.
  - We take part in the **Divest-/Invest-Debate** and intend to contribute to the success of the necessary reshaping of globalization through our actions and our investment strategies.
  - We seek, initiate and foster appropriate communication and **networking** with other foundations, to be able to reinforce the impact of our actions in various fields of operation - for that purpose we jointly initiated the International Foundation Platform on G20 (called **Foundation20**) and are an active member of the Steering Group since the very beginning.
  - We support **innovative instruments on litigation in the area of climate protection**. In the context of dangerous glacier melting we support the climate justice precedent case **Huaraz** of the Peruvian mountain guide Saúl Luciano Lliuya.
  - We also stand for a **transformation in livestock farming** and support unconventional forms of cooperation and the development of new, innovative and effective networks, an example of this our support through our Theme Fund *Animals.People.Rights*.
  - We support sustainable thinking and behaviour by supporting exciting projects for **Education for Sustainable Development (ESD)**, an example of this the *Germanwatch Climate Expedition*.
- ▶ *Each of these initiatives of the Foundation for Sustainability and Germanwatch does need specific financial support. With your donation you can contribute!*

The Foundation committees are composed of experts from politics, science, business, media and civil society.

### Management Board:

## Observing – Analysing – Acting

Under this motto Germanwatch has since 1991 been engaged in the areas of global equity and the preservation of livelihoods. The politics and economics of the North, with their global consequences, stand at the centre of our work. The situation of marginalised people in the South form the starting point for our engagement in sustainable development. The political and globalised market structures of the North, as well as their resource-intensive modes of production, which are now being increasingly imitated, are influencing human lives worldwide.

We advocate a political, economic and social framework which can ensure a future for the people of the South, who are being pushed to the margins of society through unbridled globalisation and whose very existence is threatened by the loss of their ecological and economic foundations of their livelihood.

Please find more information under [www.germanwatch.org](http://www.germanwatch.org)

nachdenken • klimabewusst reisen

For years, Germanwatch has been working on aviation issues and has insistently drawn policy makers' attention to the strong warming effects of aviation emissions. As long as mandatory policies or laws, such as an ambitious cap on aviation emissions, are not implemented, Germanwatch considers atmosfair to be the most reasonable approach to a sustainable solution.

Founded in 2005 the joint initiative between the forum anders reisen and Germanwatch atmosfair aimed to offer a voluntary instrument as an alternative for non-avoidable/ non-preventable flights. To bring up the needed financial basis for this new initiative the Foundation for Sustainability did appeal for the basic funds and is nowadays sole proprietor of the atmosfair gGmbH.

Please find more information and compensate your last flight under [www.atmosfair.de](http://www.atmosfair.de)
